Education

NIT,Hamirpur

Master of technology in Computer Science and Engg,(AI)

Aug. 2025 – Present

Hamirpur, H.P

RGPV,Bhopal

Bachelor of technology in Computer Science and Engg.

Nov.2021 – June 2025

Bhopal, M.P

Relevant Coursework

- Data Structures
- Computer Architecture
- Database Management
- Machine Learning
- Computer Network
- Deep Learning
- Operating System
- Gen-AI

Projects

AI-Money-Mentor | Python, Streamlit, Gen-AI

Feb-april 2026

- Developed an AI-driven financial advisory system using Python and Streamlit, enabling real-time portfolio analysis, risk assessment, and interactive decision-making for personal finance management.
- Implemented a portfolio analytics engine with asset allocation modeling, diversification scoring, and rule-based risk profiling, identifying investment inefficiencies such as overexposure and suboptimal distribution.
- Designed a portfolio optimization and rebalancing system using constraint-based logic and heuristic strategies, generating actionable recommendations aligned with user risk profiles and financial goals.
- Built a comprehensive financial planning module integrating retirement planning (FIRE), goal-based investment modeling, tax estimation, and insurance analysis, delivering a scalable fintech decision-support solution

City Specific Real-Estate Recommendation System | Python, Streamlit, Machine Learning

Nov-Dec 2025

- Developed an end-to-end real estate web application using Python and Streamlit that enables users to predict property prices, analyze market trends, and receive property recommendations.
- Implemented a machine learning-based price prediction module where users select inputs such as location, property type, size, number of bedrooms, to estimate property prices.
- Designed an analytics module to visualize real estate insights including price distribution, location-wise trends, and feature correlations using data visualization techniques
- Built a property recommender system that suggests similar properties based on user preferences and property features using similarity-based machine learning techniques.

Transaction Management GUI | Java, Eclipse, JavaFX

March 2024

- Designed a sample banking transaction system using Java to simulate the common functions of using a bank account.
- Used JavaFX to create a GUI that supports actions such as creating an account, deposit, withdraw, list all accounts, etc.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, PyCharm, Jupyter Notebook, Google Colab, AWS

Technologies/Frameworks: fastapi, React, Pytorch, Linux, Docker, Git, langchain

Certificate

Prodigy Infotech

Mar. 2025 – May 2025

Web Development

Virtual

- Developed responsive web pages using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and an improved user experience.
- Debugged, tested, and optimized web components in coordination with the team, contributing to cleaner code, better performance, and timely task completion.

ET Gen-AI Hackathon

May 2026

Semi-Finalist

Virtual
